Innovate Vancouver

Interactive Planning Tools

Strengthen your teams ability to leverage best practices, advanced models, and scalable interactive tools during your next planning effort.

A Holistic Approach

Planning requires a collaborative and engaged process that considers all relevant components needed to be successful. This involves setting the foundation, building upon that foundation with best practices, and aligning efforts with a competitive vision that can lead the industry.

Interactive Tools

Innovate Vancouver's learning & innovation management framework leverages online interactive tools, digital and print publications, training materials, and android apps to support f2f and virtual collaboration.

Best Practices

Best Practices are often adapted to meet the unique needs of each project, corporate culture, and team. Unfortunately, these short cuts are often not well suited to meet the needs of the final product or service. Customers are often left unsatisfied, and corporate goals are not delivered. Following best practices to the best of the team's ability will both strengthen quality and the delivery of customer requirements.
